Thinks CIA Is NG

To the Editor:

The Central Intelligence Agency, which is supposed to know what's going on, reportedly spends a billion dollars a year, employing 12,000 to 18,000 people. But after examples of its fact-finding in the Castro rebel invasion, just what benefit is received?

How long could an ordinary businessman pay out such money and employ so many incompetents as it appears was done in this Government Agency?

DAVE PAISLEY
